ESG issuance in line with ICMA Principles

The commercial teams of La Banque Postale propose **Green or Social Loans** – with a specific loan documentation including a description of the planned green or social project - to finance green and social investments by French local authorities.

The classification as Eligible Green or Social Loan is **verified and validated by Sfil**.

For the export financing activity, all the projects go through an enforced diligence process meant to ensure that **relevant environmental and social (E&S) safeguards are systematically met**. All information relevant for the eligibility under the framework will be collected and analyzed by the Export Credit Department and **reviewed by the 'Green, Social and Sustainability bond committee'**.

Allocations for each transaction are managed under a **transaction by transaction approach**.

Allocation reporting will be available within one year from the date issuance and annually thereafter until full allocation.

*“**Sustainalytics** is of the opinion that the Sfil Group Green, Social & Sustainability Bond Framework is credible and impactful and **aligns with the Sustainability Bond Guidelines 2021, Green Bond Principles 2021, and Social Bond Principles 2021.**”*

Social Note Framework

Social issuance in line with ICMA Principles

The Social Note Program financing the **French public hospital sector is managed separately** from the Green, Social and Sustainability Framework.

Social notes will finance and/or refinance the **portfolio of loans to French public hospitals** (new loans and loans originated since 2013).

In addition, the credit decision by Sfil is in part based on an extra-financial analysis of the public hospital to assess the **Healthcare Added Value** (“HAV”) of a public hospital.

Internal systems have been set up by Sfil to track the use of proceeds of the Social Notes and monitor the Health Loan Portfolio. Social Notes are managed under a **portfolio approach**, i.e. the total outstanding amount of Social Notes is **always lower than the size of the Health Loan Portfolio**.

Allocation reporting will be available within one year from the date issuance and annually thereafter until full allocation. In addition, Sfil will report on **social impact indicators**.
